Norway is a beautiful and varied country. In this exhibit, the beauty, cultural history, and human and material resources of Norway will be displayed through a systematic presentation of the country's 19 fylkes (counties). From the Lappland region of Finnmark on the Arctic Ocean, to the fjords of Sogn og Fjordane and Rogaland in the south, the sites, cities, and people of the country will be viewed through the eyes of the country's diverse postal releases. In addition to stamps and covers depicting scenes and people from the 19 fylke, postmarks will be shown from many of the villages and municipalities that slightly over 5 million Norwegians call home.
